ANNEX

Reasons for the changes to 60936-1

Recent changes to the ITU radio regulations and the subsequent introduction of a number of new and modified ITU recommendations on Spurious and Out of Band emissions, mean that Annex D to 60936-1 needs to be revised.

Revision will include references to Out of Band emission measurements as well as spurious emission measurements as well as references to emission levels in adjacent exclusive and non-exclusive radiodetermination bands.

No other changes are expected to take place and it is envisaged that this revised Annex D will be amendment 1.
